EGR Accordion

What it is: A collapsible section for FAQs or long content.

1. Add the Component

- From the page editor, click **Add Component → EGR Accordion**.
- A new “Create new EGR Accordion” form will appear (like in the screenshot).

2. Set the Accordion Title

- Enter a short **Accordion Title** (up to 255 characters).
- This is the label for the whole accordion block (e.g., *Frequently Asked Questions*).

3. Choose a Layout Style

- Use the **Layout Style** dropdown.

- b. Common options:
 - i. *Boxed (Inside Container)* = accordion is aligned within the page container.
 - ii. *Full Width* (if available) = accordion stretches edge-to-edge.
- 4. **Select a Background Color (Optional)**
 - a. Enter a hex color code (e.g., #f8f9fa) or a color name.
 - b. Leave blank for the default white background.
- 5. **Choose Accordion Controls**
 - a. Under **Show Controls**, select how the accordion behaves:
 - i. **N/A** → No controls shown.
 - ii. **Close** → Accordion loads with all items collapsed.
 - iii. **Open** → Accordion loads with the first item expanded.
 - b. For FAQs, “Open” is often a good default.
- 6. **Add a Component ID (Optional)**
 - a. Enter a unique ID if you want to reference this accordion in code or anchors (e.g., faq-accordion).
 - b. Otherwise, leave it blank.
- 7. **Add Accordion Items**
 - a. Scroll down to the **Accordion Items** section.
 - b. For each item:
 - i. Enter the **Accordion Title** (e.g., “What programs are available?”).
 - ii. Add the **Accordion Content** in the rich text editor (can include paragraphs, links, lists, images, etc.).
 - c. Use the **Add another item** option (usually at the bottom) to create multiple panels.
- 8. **Save Your Accordion**
 - a. Once all items are added, click **Save** at the bottom of the form.
 - b. Your accordion will now display on the page with collapsible panels.

EGR Button

1. Add the Component

- a. In the page editor, click **Add Component → EGR Button**.
 - b. The “Create new EGR Button” form will open.
2. **Set Button Size**
 - a. Use the **Button Size** dropdown to choose Small, Medium, or Large.
 - b. Default is Medium.
3. **Choose Buttons per Row**
 - a. Use the **Buttons Per Row** dropdown to decide how many buttons will display side by side (1–4).
4. **Fill in Button Details**
 - a. For each button slot (Button 1, Button 2, etc.):
 - i. **Button Text:** Enter the label that will appear on the button (e.g., “Apply Now”).
 - ii. **Button URL:** Enter the link. You can:
 1. Type an internal path like /node/add.
 2. Enter an external URL like <https://example.com>.
 3. Use <front> to link to the homepage.
 4. Use <nolin> to display plain text (no link).
 5. Use <button> for a keyboard-accessible button.
 - iii. **Button Background Color:** Enter a hex code (e.g., #18453B) or a named color.
 - iv. **Button Text Color:** Enter a hex code (e.g., #FFFFFF) or a named color.

5. Configure Button Alignment

- Use the **Button Alignment** dropdown to align buttons to the Left, Center, or Right.

6. Select Layout Style

- a. Use the **Layout Style** dropdown to choose:
 - i. *Boxed* → places the button inside a content container.
 - ii. *Full Width* → stretches the button to the full page width.

7. Set Background Color for the Component (Optional)

- a. Enter a hex code (e.g., #f8f9fa) or a color name (e.g., lightgray) for the container background.
- b. Leave blank for a transparent background.

8. Add Multiple Buttons (Optional)

- a. Scroll down to add Button 2, Button 3, and Button 4 if needed.
- b. Each button has the same fields: Text, URL, Background Color, and Text Color.

9. Save the Component

- a. When all button details are entered, click **Save**.
- b. The buttons will display on the page according to the size, layout, and alignment you selected.

EGR Cards

1. Add the Component

- a. In the page editor, click **Add Component → EGR Cards**.
- b. The “Create new EGR Cards” form will open.

2. Choose a Layout Style

- a. Use the **Layout Style** dropdown to select how the card section should appear.
- b. Common options include “Boxed (Inside Container)” or “Full Width.”
- c. Leave as “None” if no layout wrapper is needed.

3. Set Background Color (Optional)

- a. Enter a color name or hex code (e.g., #f8f9fa) to define the background color for the entire card section.
- b. Leave blank for a transparent or white background.

4. Select the Number of Columns

- a. Use the **Columns** dropdown to determine how many cards should display in each row (e.g., 2, 3, or 4).
- b. Choose “None” if you want the cards to stack vertically.

5. Set Image Height (Optional)

- a. Use the **Image Height** dropdown to control how tall each card image appears.
- b. Common options:
 - i. **Fixed (200px)** – consistent image height.
 - ii. **Auto** – adjusts height based on the original image ratio.

6. Add Card Items

- a. Scroll to the **Cards** section. Each card is created as an **EGR Card Item**.
- b. For each card:
 - i. **Card Image:** Click **Choose File** to upload an image (PNG, JPG, GIF, or WEBP up to 80 MB).
 - ii. **Card Title:** Enter the card title (required). Keep it short and descriptive.
 - iii. **Card Description:** Add text describing the card content. You can format text, add links, or insert lists using the editor toolbar.
 - iv. **Text Format:** Choose between “Full HTML,” “Basic HTML,” or “Plain Text.”
 - v. **Link Button Text:** Enter the label for the button (e.g., “Learn More,” “View Details”).
 - vi. **Card Link:**
 1. Type or paste an internal path like /node/add or an external link such as <https://example.com>.
 2. You can also use <front> to link to the homepage or <nolink> for display-only text.

7. Add More Cards (Optional)

- a. To add additional cards, click **Add EGR Card Item** at the bottom.
- b. Repeat the same fields for each new card.

8. Save the Component

- a. After adding all cards, click **Save** at the bottom of the form.

EGR CTA Mixed

1. Add the Component

- a. In the page editor, click **Add Component → EGR CTA Mixed**.
- b. The “Create new EGR CTA Mixed” form will appear.

2. Enter a Title

- a. In the **Title** field, add a short, clear headline for your call-to-action (CTA).
- b. Example: *Join Our Upcoming Event* or *Apply for Scholarships Now*.
- c. This is a required field.

3. Add a Description

- a. In the **Description** field, write a brief message that supports your CTA.
- b. You can format text, add links, or insert lists using the editor toolbar.
- c. Example: *Learn more about our academic programs and how to apply today*.
- d. This field is also required.

4. Add an Image (Optional)

- a. Under the **Image** section, click **Choose File** to upload an image.
- b. Allowed formats: PNG, GIF, JPG, JPEG, WEBP (up to 80 MB).
- c. The image will appear beside or above the text depending on layout options.

5. Set Mobile Image Position

- a. Use the **Mobile Image Position** dropdown to select where the image should focus on mobile screens.
- b. Options include **Center**, **Top**, or **Bottom**.
- c. “Center” ensures the key part of the image stays visible on smaller devices.

6. Add CTA Text

- a. In the **CTA Text** field, enter the text that appears on the action button.
- b. Example: *Learn More*, *Get Started*, *Apply Now*.

7. Add CTA Link

- a. In the **CTA Link** field, type or paste the link destination for your button.
- b. You can:
 - i. Enter an internal path such as `/node/add`.
 - ii. Use an external link like <https://example.com>.
 - iii. Use `<front>` for the homepage.
 - iv. Use `<nolink>` for a button without navigation.
 - v. Use `<button>` for an accessible keyboard-activated button.

8. Choose CTA Style (Optional)

- a. Use the **CTA Style** dropdown to select a visual style for the button (e.g., solid, outlined).

- b. Leave as “None” to use the default site styling.

9. **Set Image Layout (Optional)**

- a. Use the **Image Layout** dropdown to determine how the image and text appear relative to each other.
- b. Common layouts include side-by-side or stacked configurations depending on your site theme.

10. **Set Background Color (Optional)**

- a. In the **Background Color** field, enter a hex code (e.g., #f8f9fa) or a color name (e.g., lightgray).
- b. Leave blank for a white background.

11. **Select Layout Style (Optional)**

- a. Use the **Layout Style** dropdown to choose how the component is positioned on the page:
 - i. *Boxed (Inside Container)* keeps it within the content width.
 - ii. *Full Width* stretches it across the entire page width.
 - iii. *None* applies no container styling.

12. **Save the Component**

- a. Review your inputs, then click **Save** at the bottom of the form.
- b. The CTA block will display with the image, text, and button arranged according to your chosen layout.

EGR Divider

1. Add the Component

- In the page editor, click **Add Component** → **EGR Divider**.
- The “Create new EGR Divider” form will open.

2. Set Divider Color

- In the **Divider Color** field, enter a valid hex color code (for example, #18453B for dark green or #ff0000 for red).
- You can also type a named color such as black or gray.
- This determines the color of the horizontal line divider.

3. Set Divider Thickness

- a. In the **Thickness (pixels)** field, enter a number to define how thick the divider line should appear.
- b. Example:
 - i. 1 for a thin line.
 - ii. 3 or 4 for a thicker, more visible divider.

4. Choose Divider Style

- a. Use the **Divider Style** dropdown to select how the line will appear.
- b. Common options include:
 - i. **Solid** – standard continuous line.
 - ii. **Dashed** – line with dashes.
 - iii. **Dotted** – line with dots.

5. Adjust Top Margin (Optional)

- a. In the **Top Margin (pixels)** field, specify how much space to leave above the divider.
- b. Example: 20 will create a 20-pixel gap before the divider line.

6. Adjust Bottom Margin (Optional)

- a. In the **Bottom Margin (pixels)** field, specify how much space to leave below the divider.
- b. Example: 20 will create a 20-pixel gap after the divider line.

7. Select Layout Style

- a. Use the **Layout Style** dropdown to choose how the divider is positioned within the page layout:
 - i. **Boxed** – the divider aligns with the content container width.
 - ii. **Full Width** – the divider stretches across the entire width of the screen.
 - iii. **None** – no layout container applied.

8. Save the Component

- a. After filling in all fields, click **Save**.
- b. The divider line will appear on your page according to the selected color, thickness, and margins.

EGR Aside

1. Add the Component

- In the page editor, click **Add Component → EGR Aside**.
- The “Create new EGR Aside” form will open.

2. Enter the Title

- In the **Title** field, enter an optional heading for the section (for example, *About the Program* or *Key Takeaways*).
- This title will display above the aside content.

3. Add a Subtitle (Optional)

- a. In the **Subtitle** field, you can include supporting text below the title.
- b. Use the formatting toolbar to add bold, italics, links, or lists.

4. Choose Text Format for Subtitle

- a. Use the **Text Format** dropdown (Full HTML, Basic HTML, or Plain Text) depending on the desired formatting options.

5. Select Title Heading Size

- a. Use the **Title Heading Size** dropdown to determine how large the title should appear (Heading 2, Heading 3, etc.).
- b. Choose **Heading 2** for main sections and **Heading 3** for sub-sections.

6. Add Main Content

- a. In the **Main Content** field, enter the primary body text that will appear in the left (wider) column.
- b. Use the formatting toolbar to style your content, insert images, or add links.
- c. Example: use this area for detailed explanations, background information, or general text.

7. Upload an Aside Image (Optional)

- a. Under the **Aside Image** section, click **Choose File** to upload an image.
- b. Accepted formats: PNG, GIF, JPG, JPEG.
- c. Maximum size: 80 MB.
- d. The image will appear in the right-side column.

8. Add Aside Content

- a. In the **Aside Content** field, add supporting text or highlights related to the image.
- b. You can use this section for quick facts, summaries, or key bullet points.

9. Set Aside Content Text Format

- a. Use the **Text Format** dropdown to select the type of formatting allowed (Full HTML, Basic HTML, Plain Text).

Rich text content below the image in the aside column.

- a. Use the **Layout Style** dropdown to choose how the component aligns on the page:
 - i. **Boxed** – contained within the main content width.
 - ii. **Full Width** – stretches across the full width of the page.

12. Choose Column Ratio

- a. Use the **Column Ratio** dropdown to determine the width between main and aside columns:
 - i. **3:1 (Main:Aside)** – wider main content, smaller aside area.
 - ii. **1:1** – equal widths.
 - iii. **1:3 (Main:Aside)** – smaller main content, larger aside area.

13. Set Aside Alignment

- a. Use the **Aside Alignment** dropdown to control vertical positioning of the aside column:
 - i. **Top** – aligns with the top of the main content.
 - ii. **Center** – vertically centers the aside content.
 - iii. **Bottom** – aligns with the bottom.

14. Set Background Colors (Optional)

- a. **Background Color:** enter a hex code (e.g., #f8f9fa) or color name for the overall section.
- b. **Aside Background Color:** enter a different hex code or color name to visually separate the aside column.

15. Choose Image Style (Optional)

- a. Use the **Image Style** dropdown to choose how the aside image displays (e.g., Default, Rounded, or Framed depending on theme options).

16. Customize Text Colors (Optional)

- a. **Main Content Text Color:** enter a hex code or named color for the main content area (e.g., #333333 or black).
- b. **Aside Content Text Color:** enter a hex code or named color for the aside column (e.g., #666666 or gray).

17. Save the Component

- a. Review all fields for accuracy.
- b. Click **Save** to create the EGR Aside component.
- c. The content will appear in two columns on the page according to your selected layout and color scheme.

EGR Counter

1. Add the Component

- In the page editor, click **Add Component → EGR Counter**.
- The “Create new EGR Counter” form will open.

2. Select Layout Style

- a. Use the **Layout Style** dropdown to choose how the counter section is displayed on the page.
- b. Options may include:
 - i. **Boxed** – keeps the counter aligned inside the main content container.
 - ii. **Full Width** – stretches the counter section across the entire page width.
 - iii. **None** – no layout container styling.

3. Set Background Color (Optional)

- a. Enter a hex code (e.g., #f8f9fa) or a named color (e.g., lightgray).
- b. This sets the background color for the entire counter section.
- c. Leave blank for the default white background.

4. Choose Number of Columns (Optional)

- a. Use the **Number of Columns** dropdown to control how many counter items appear in a single row (e.g., 2, 3, 4).
- b. Select **None** if you prefer automatic layout adjustment.

5. Add Counter Items

- a. Scroll down to the **Counter Item** section.
- b. Each individual counter (e.g., “5000+ Students”) is created as an **EGR Counter Item**.

6. Set Icon (Optional)

- a. In the **Icon** field, you can specify a Bootstrap icon class name if icons are supported by your site’s theme.
- b. Examples:
 - i. bi-speedometer2
 - ii. bi-people
 - iii. bi-trophy
- c. You can find icons at <https://icons.getbootstrap.com>.

7. Add Prefix (Optional)

- a. Use the **Prefix** field to display a symbol before the number.
- b. Example: \$, #, or any text label such as “No.”

8. Enter Target Number

- a. In the **The target number** field, enter the final number that the counter should animate to.
- b. Example: 5000 or 120.
- c. This field is required.

9. Add Suffix (Optional)

- a. Use the **Suffix** field to add a symbol or unit after the number.

- b. Example: +, %, K, or “students”.
- c. Example output: 5000+ or 85%.

10. Add Description Text

- a. In the **Description text** field, add a short label or caption that appears below the number.
- b. Example: *Graduates*, *Projects Completed*, or *Years of Experience*.

11. Set Animation Duration (Optional)

- a. Enter the number of seconds it should take for the counter to animate from 0 to the target number.
- b. Example: 2 will animate the number over two seconds.

12. Add More Counters (Optional)

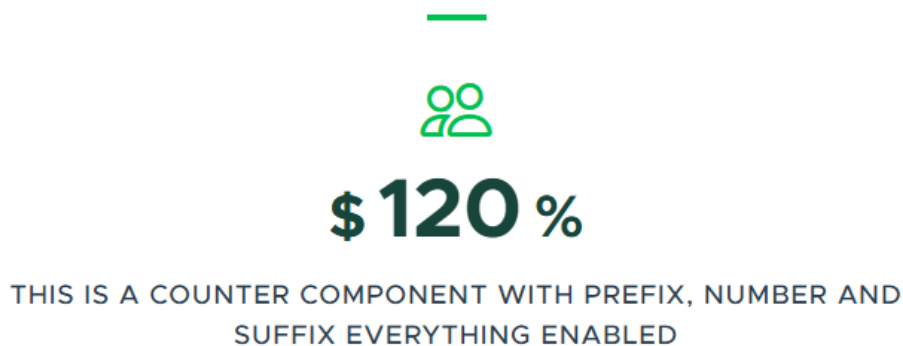

- a. Click **Add EGR Counter Items** at the bottom to add multiple counters.
- b. Repeat steps 6–11 for each new counter.

13. Set Text Color (Optional)

- a. In the **Text Color** field, enter a hex or named color (e.g., #18453B, white, or #333333).
- b. This affects both the number and its accompanying text/icon.

14. Save the Component

- a. Review all fields for accuracy.
- b. Click **Save** at the bottom.
- c. The counters will appear on your page with animated numbers and styled text based on your configuration.

EGR Heading

1. Add the Component

- In the page editor, click **Add Component → EGR Heading**.
- The “Create new EGR Heading” form will appear.

2. Enter the Heading Text

- a. In the **Heading Text** field, type the title or section heading you want displayed on the page.
- b. Example: *Program Overview*, *Contact Information*, or *Upcoming Events*.
- c. This field is required.

3. Select the Heading Level

- a. Use the **Heading Level** dropdown to set the heading size and hierarchy (H1–H6).
- b. **H2** is commonly used for the main sections.
- c. **H3** or **H4** can be used for subsections under larger headings.
- d. Choose based on your page structure to maintain accessibility and proper SEO hierarchy.
- e. This field is required.

4. Toggle Green Underline (Optional)

- a. If you want a visual underline beneath the heading, switch **Show Green Underline** on.
- b. Leave it off for plain text styling.

5. Choose Layout Style

- a. Use the **Layout Style** dropdown to control how the heading aligns with other page content:
 - i. **Boxed** – keeps the heading within the content container width.
 - ii. **Full Width** – allows the heading to span across the full page width.
 - iii. **None** – no container styling is applied.

6. Set Text Alignment

- a. Use the **Text Alignment** dropdown to determine the heading's position:
 - i. **Left** – aligns heading text to the left (default).
 - ii. **Center** – centers the heading text.
 - iii. **Right** – aligns the heading to the right.

7. Save the Component

- a. Review your settings and click **Save** at the bottom.
- b. The heading will appear on the page with the chosen style, alignment, and heading level.

EGR Content Block

1. Add the Component

- In the page editor, click **Add Component** → **EGR Content Block**.

- b. The “Create new EGR Content Block” form will appear.

2. Enter the Title

- a. In the **Title** field, add the main heading for the content block.
- b. Example: *About Us*, *Program Overview*, or *Key Highlights*.
- c. This field is optional but helps structure your content clearly.

3. Select Title Size

- a. Use the **Title Size** dropdown to set the heading level for your title (e.g., H2, H3, H4).
- b. Use **H2** for primary sections, **H3** for subsections.

4. Add a Subtitle (Optional)

- a. In the **Subtitle** field, enter supporting text that appears below the title.
- b. Keep it brief and descriptive (e.g., *Learn more about our department’s goals and achievements*).

5. Add Main Content

- a. In the **Content** field, enter the main body text for the content block.
- b. You can format text using the toolbar (bold, italic, lists, tables, links, etc.) or insert images directly.
- c. This field is required.

6. Choose Text Format

- a. Use the **Text format** dropdown to choose how the text is processed.
- b. **Full HTML** allows maximum flexibility (for formatted text, images, and links).
- c. **Basic HTML** limits advanced formatting.
- d. **Plain Text** removes all styling.

7. Select Layout Style

- a. Use the **Layout Style** dropdown to control how the block fits within the page:
 - i. **Boxed** – aligns the content within a container (standard).
 - ii. **Full Width** – spans across the full page width.
 - iii. **Edge to width**
 - iv. **None**

8. Set Text Alignment

- a. Use the **Text Alignment** dropdown to choose how text is positioned:
 - i. **Left** (default), **Center**, or **Right**.

9. Set Background Color (Optional)

- a. Enter a hex code (e.g., #f8f9fa) or color name (e.g., lightgray) to define the background color of the block.
- b. Leave blank for a white or transparent background.

10. Set Text Color (Optional)

- a. Enter a hex code (e.g., #212529) or color name (e.g., black or white) to adjust the text color.
- b. Use contrasting colors to ensure readability against your chosen background.

11. Add Link Buttons (Optional)

- a. Scroll to the **Link Buttons** section at the bottom.
- b. You can add up to three buttons.
- c. Each button can link to another page, form, or external site.
- d. To add:
 - i. Click **Add Link Button** (or **Edit Content Block Link** if it already exists).
 - ii. Provide **Button Text** (label) and **URL** (destination).
 - iii. You can enter an internal path (/node/add), an external link (<https://example.com>), or use <front> to link to the homepage.

12. Save the Component

- a. Review your fields.
- b. Click **Save** at the bottom.
- c. The content block will appear on your page with your chosen title, body text, and optional link buttons.

EGR Contact Map

1. Add the Component

- In the page editor, click **Add Component → EGR Contact Map**.
- The “Create new EGR Contact Map” form will open.

2. Enter the Title

- a. In the **Title** field, add a heading for the contact section (for example, *Our Office Location* or *Visit Us*).
- b. This is optional but helps users identify the section.

3. Enter the Address

- a. In the **Address** field, type the complete physical address for your location.
- b. Example:

428 Engineering Building, 428 S Shaw Ln,
East Lansing, MI 48824

- c. This field is required since the map pin is generated based on this address.

4. Add Phone Number (Optional)

- a. In the **Phone** field, enter a contact phone number in standard format.
- b. Example: +1 (517) 355-1855.

5. Add Email (Optional)

- a. In the **Email** field, add a valid contact email address.
- b. Example: info@egr.msu.edu.

6. Enter Business Hours

- a. In the **Hours** field, specify your office or business hours.
- b. Example:

Monday – Friday: 9:00 AM – 5:00 PM
Closed on Weekends

- c. Use the text formatting toolbar to bold or style the content if needed.

7. Add Additional Information (Optional)

- a. Use the **Additional Information** field for extra location details or directions.
- b. Example:

Located across from the Student Union. Free visitor parking available behind the building.

8. Set Map Height

- a. In the **Map Height** field, specify how tall the map should appear in pixels.
- b. Default value: 400 px.
- c. Increase to 500 or 600 for a larger display.

9. Set Map Zoom Level

- a. In the **Map Zoom Level** field, set how close the map should zoom in on your location.

- b. Range: 1 (global view) to 20 (street-level).
- c. Default is 15, which shows a detailed view of the surrounding area.

10. Choose Layout Style

- a. Use the **Layout Style** dropdown to select how the section should display:
 - i. **Boxed** – contained within the page's content width.
 - ii. **Full Width** – stretches across the full width of the page.

11. Set Contact Info Position

- a. Use the **Contact Info Position** dropdown to choose where the contact details appear relative to the map:
 - i. **Left** – contact info appears on the left, map on the right.
 - ii. **Right** – contact info appears on the right, map on the left.

12. Select Map Provider

- a. In the **Map Provider** dropdown, choose how the map will be rendered:
 - i. **OpenStreetMap (Free)** – no API key needed.
 - ii. **Google Maps** – requires a Google API key (see next step).

13. Add Google Maps API Key (Optional)

- a. If using **Google Maps**, enter your Google Maps API key in the **Google Maps API Key** field.
- b. Leave blank to use the site's default or when using OpenStreetMap.

14. Save the Component

- a. Review all fields for accuracy.
- b. Click **Save** at the bottom.
- c. The contact map will display your address, map view, and contact details according to the chosen layout.

Logo image *

Add a new file *

Choose File No file chosen

Upload the logo image.
One file only.
80 MB limit.
Allowed types: png gif jpg jpeg svg webp.

Company Name

Name of the company (used for hover tooltip).
Content limited to 255 characters, remaining: 255

Link

- URL to link to when logo is clicked.
- Start typing the title of a piece of content to select it. You can also enter an internal path such as `/pageid` or an external URL, such as `https://example.com`. Enter `<photo>` to link to the front page. Enter `<noLink>` to display link text only. Enter `<button>` to display keyboard-accessible link text only.

Add logo items to display.

Add Logo Item to Logos

Display Mode

Grid

How to display the logos.

Grid Columns

Auto

Number of columns for grid display.

Logo Size

Medium

Size preset for logos.

Logo Height

px

Fixed height for logos in pixels (overrides size preset).

Grayscale Filter

☒

Apply grayscale filter to logos (color on hover).

Hover Effect

Scale

Effect to apply on hover.

1. Add the Component

- In the page editor, click **Add Component** → **EGR Logos**.
- The “Create new EGR Logos” form will open.

2. Enter a Title (Optional)

- In the **Title** field, add the section heading for your logos block.
- Example: *Our Partners, Supported By, or Affiliated Institutions*.
- This helps label the section on your page.

3. Add a Subtitle (Optional)

- a. In the **Subtitle** field, enter short descriptive text that appears below the title.
- b. Example: *We collaborate with leading organizations worldwide.*
- c. You can format this text using the toolbar (bold, links, italics, etc.).

4. Choose Text Format for Subtitle

- a. Use the **Text Format** dropdown (Full HTML, Basic HTML, or Plain Text) to define how the subtitle will render.

5. Select Title Heading Size

- a. Use the **Title Heading Size** dropdown to set the title's heading level (e.g., H2, H3).
- b. **H2** is standard for main section titles.

6. Add Logo Items

- a. Scroll to the **Logos** section. Each logo must be added as a separate **Logo Item**.
- b. For each logo:
 - i. **Logo Image:** Click **Choose File** to upload the logo image.
 1. Allowed formats: PNG, GIF, JPG, JPEG, SVG, WEBP (up to 80 MB).
 2. This field is required.
 - ii. **Company Name (Optional):** Enter the name of the organization or partner.
 1. This text appears as a tooltip when users hover over the logo.
 - iii. **Link (Optional):** Add a URL if you want the logo to link to an external site or internal page.
 1. Examples:
 - a. /about (internal page)
 - b. <https://partner.com> (external site)
 - c. <front> links to the homepage.

7. Add More Logos

- a. Click **Add Logo Item** to include additional logos.
- b. Repeat the above steps for each logo image you want to display.

8. Set Display Mode

- a. Use the **Display Mode** dropdown to control how logos are displayed:
 - i. **Grid** – displays logos in a multi-column layout.
 - ii. **Carousel** – scrolls logos horizontally (if available in your site's theme).

9. Choose Grid Columns

- a. Use the **Grid Columns** dropdown to define how many logos appear per row (e.g., 3, 4, 5).
- b. Set to **Auto** if you want Drupal to determine the layout automatically.

10. Select Logo Size

- a. Use the **Logo Size** dropdown to choose a preset size (Small, Medium, or Large).
- b. You can manually control size using the height field below.

11. Adjust Logo Height (Optional)

- a. In the **Logo Height** field, set a fixed height for all logos in pixels (e.g., 100).
- b. Leave blank to use the logo's original proportions.

12. Apply Grayscale Filter (Optional)

- a. Toggle **Grayscale Filter** to display logos in black and white by default.
- b. The logos will return to color when hovered over.

13. Select Hover Effect

- a. Use the **Hover Effect** dropdown to choose how logos behave when hovered over:
 - i. **None** – no change.
 - ii. **Scale** – slightly enlarges the logo on hover.
 - iii. **Fade** – changes logo opacity on hover.

14. Select Layout Style

- a. Use the **Layout Style** dropdown to define how the section fits within the page:
 - i. **Boxed** – keeps logos within a container aligned with other content.
 - ii. **Full Width** – extends the section across the page width.

15. Set Background Color (Optional)

- a. Enter a hex code (e.g., #f8f9fa) or color name (e.g., lightgray) for the component's background.
- b. Leave blank for a transparent or white background.

16. Set Vertical Padding

- a. Use the **Vertical Padding** dropdown to control spacing above and below the section (Small, Medium, or Large).

17. Set Logo Alignment

- a. Use the **Logo Alignment** dropdown to choose how logos are aligned within their containers:
 - i. **Left, Center, or Right.**

18. Set Gap Between Logos

- a. Use the **Gap Between Logos** dropdown to control spacing between each logo (Small, Medium, or Large).

19. Save the Component

- a. Once all logos and settings are added, click **Save**.
- b. The logos will display according to the chosen layout, spacing, and hover effects.

EGR Logos Title

EGR Logo Subtitle

Layout Style

Boxed ▾

Container layout style for the component.

Background Color

e.g., #f8f9fa

Background color for the component (hex or named color).

Content limited to 255 characters, remaining: **255**

Vertical Padding

Medium ▾

Vertical padding for the component.

Logo Alignment

Center ▾

Alignment of logos within their containers.

Gap Between Logos

Medium ▾

Spacing between logos.

EGR Banner

1. Add the Component

- a. In the page editor, click **Add Component → EGR Banner**.

- b. The “Create new EGR Banner” form will open.

2. Enter the Title

- a. In the **Title** field, type the main heading text that will appear over the banner image.
- b. Example: *Welcome to the College of Engineering, Innovating for a Better Future, or About Our Department.*
- c. This serves as the primary visual heading on the banner.

3. Add a Subtitle (Optional)

- a. In the **Subtitle** field, include supporting text that displays below the main title.
- b. Example: *Building the engineers of tomorrow through innovation and research.*
- c. Keep it short and descriptive.

4. Set the Title Heading Size

- a. Use the **Title Heading Size** dropdown to select the HTML heading level (H1, H2, H3).
- b. **H2** is the standard for banners unless this is the page’s main title (then use H1).

5. Upload Banner Image

- a. Under **Banner Image**, click **Choose File** and upload a background image for the banner.
- b. Supported file types: PNG, GIF, JPG, JPEG.
- c. Recommended dimensions: at least **1600px wide** for full-width display.
- d. Maximum file size: 80 MB.

6. Set Mobile Image Position

- a. Use the **Mobile Image Position** dropdown to determine which part of the image remains visible on smaller screens.
- b. Options include **Top**, **Center**, or **Bottom**.
- c. Default: **Center** (recommended for balanced layout).

7. Select Layout Style

- a. Choose how the banner aligns with the rest of the page:
 - i. **Boxed** – fits within a container width (standard).
 - ii. **Full Width** – spans across the entire screen edge-to-edge.

8. Set Text Position

- a. Use the **Text Position** dropdown to define where text appears over the image:
 - i. **Top Left**, **Center Center**, **Bottom Right**, etc.

- b. Default: **Center Center** (text is centered both vertically and horizontally).

9. Define Minimum Height

- a. Enter a value in **Minimum Height** to control banner size.
- b. Default is **400px**, but you can adjust depending on image proportions:
 - i. Example: 500px for larger hero banners.

10. Enable or Disable Overlay

- a. Toggle **Show Overlay** to add a dark transparent layer behind the text for better readability.
- b. Recommended: **Enabled** when using bright or detailed images.

11. Adjust Overlay Opacity

- a. If overlay is enabled, set its opacity between **0** (transparent) and **1** (solid black).
- b. Example: 0.6 gives a balanced, semi-transparent overlay.

12. Set Background Color (Optional)

- a. Enter a hex code (e.g., #18453B) or color name (e.g., *darkgreen*) for the overlay background.
- b. Use this if you want to reinforce brand color tones or darken the banner area.

13. Set Text Color (Optional)

- a. Enter a hex color code (e.g., #FFFFFF) or color name (e.g., *white*) for the title and subtitle text.
- b. Make sure the text color contrasts with your background image or overlay for readability.

14. Save the Component

- a. Review your inputs and click **Save** at the bottom.
- b. The banner will now appear on the page with your chosen text, image, and style settings.

EGR Video

1. Add the Component

- In the page editor, click **Add Component → EGR Video**.
- The “Create new EGR Video” form will open.

2. Enter the Title (Optional)

- In the **Title** field, enter the main heading for your video section.
- Example: *Student Spotlights, Research Highlights, or Virtual Tour*.
- This title appears above the video(s).

3. Add a Subtitle (Optional)

- Use the **Subtitle** field to include a brief description or context.
- Example: *Hear from our faculty and students about their experiences.*

4. Choose Title Heading Size

- a. From the **Title Heading Size** dropdown, choose the HTML heading level for the title (e.g., H2, H3).
- b. H2 is recommended for most sections.

5. Select Display Mode

- a. Use the **Display Mode** dropdown to choose how videos are arranged:
 - i. **Single Video** – display one large featured video.
 - ii. **Grid** – show multiple videos in rows and columns.
 - iii. **Carousel** – display videos in a sliding carousel (if supported by your site).

6. Set Grid Columns (If Using Grid Layout)

- a. In the **Grid Columns** dropdown, choose how many videos display per row.
- b. Example: **3 Columns** shows three videos side by side.
- c. Use fewer columns for larger video thumbnails.

7. Select Layout Style

- a. Use the **Layout Style** dropdown to determine how the section fits within the page:
 - i. **Boxed** – aligns with the main content width.
 - ii. **Full Width** – spans across the entire screen.

8. Add Video Items

- a. Scroll to the **Videos** section.
- b. Click **Add Video Item**.
- c. You'll be prompted to enter details for each video:
 - i. **Video Title (optional)** – a label for the video.
 - ii. **Video URL** – paste a YouTube or Vimeo link (e.g., <https://www.youtube.com/watch?v=abcd1234>).
 - iii. **Thumbnail (optional)** – upload a preview image if you want a custom cover.
 - iv. **Description (optional)** – short caption or explanation for the video.
- d. You can add multiple videos by clicking **Add Video Item** again.

9. Set Background Color (Optional)

- a. Enter a hex color code (e.g., #f8f9fa) or color name (e.g., *lightgray*).
- b. This color will appear behind the video area.
- c. Leave blank for default white background.

10. Set Text Color (Optional)

- a. Enter a hex code (e.g., #333333) or color name (e.g., *black* or *white*).
- b. This changes the color of any titles or captions in the section.

11. Toggle Video Border (Optional)

- a. Turn on **Show Video Border** to add a border around each embedded video.
- b. This helps visually separate videos in a grid layout.

12. Toggle Video Shadow (Optional)

- a. Enable **Show Video Shadow** to apply a soft drop shadow around each video.
- b. Useful for adding visual depth on white backgrounds.

13. Autoplay (Optional)

- a. Enable **Autoplay** to automatically start playing videos when the page loads.
- b. Note: Autoplay videos are **muted by default** to comply with browser rules.

14. Show Controls

- a. Toggle **Show Controls** to allow users to pause, play, and adjust volume.
- b. Recommended to keep enabled for accessibility.

15. Lazy Load (Recommended)

- a. Turn on **Lazy Load** so that videos only load when they are visible on screen.
- b. This improves page performance and loading speed.

16. Privacy Enhanced Mode (Optional)

- a. Enable **Privacy Enhanced Mode** if embedding YouTube videos.
- b. This ensures no cookies are set until the user interacts with the video.

17. Save the Component

- a. Review all your settings.
- b. Click **Save** at the bottom.
- c. The videos will now display according to your chosen layout and settings.

EGR View

1. Add the Component

- In the page editor, click **Add Component** → **EGR View**.
- The “Create new EGR View” form will open.

2. Select Content Type

- a. Use the **Content Type** dropdown to choose what kind of embedded content you want to display:
 - i. **View** – embed a Drupal View (for lists, grids, dynamic content, etc.).
 - ii. **Block** – embed a Drupal Block (for static or reusable components).
- b. Most cases will use **View**.

3. Enter a Title (Optional)

- a. In the **Title** field, type a heading for the section.
- b. Example: *Recent News, Upcoming Events, or Faculty Highlights*.
- c. This title will display above the embedded view or block.

4. Enter the View Machine Name

- a. In the **View** field, enter the machine name of the view you want to embed.
- b. Example:
 - i. content, who_s_new, frontpage
- c. The machine name identifies the specific view created in Drupal under **Structure → Views**.
- d. To find this name:
 - i. Go to **Structure → Views** in the Drupal admin panel.
 - ii. Locate the desired view.
 - iii. Copy its machine name (shown in gray under the title).

5. Enter the Display ID

- a. In the **Display** field, specify which view display to use.
- b. Common options include:
 - i. default – standard view output.
 - ii. block_1, block_2, page_1, etc. – specific view displays.
- c. Example:
 - i. If your view has a block display labeled *News Block*, the Display ID might be block_1.

6. Enter the Block Plugin ID (Optional)

- a. If you selected **Block** as the Content Type, specify the block machine name in the **Block** field.
- b. Example:
 - i. system_branding_block, search_form_block
- c. You can find this under **Structure → Block Layout → Place Block**, where IDs are visible in the block's configuration.

7. Choose a Style

- a. Use the **Style** dropdown to define the visual style of the embedded content:
 - i. **Default** – standard Drupal styling.

- ii. **Custom** – may vary depending on your site’s theme (e.g., card view, list view).

8. Select Layout Style

- a. Use the **Layout Style** dropdown to determine how the embedded view or block fits within the page:
 - i. **Boxed** – keeps the view inside a centered container.
 - ii. **Full Width** – stretches the embedded content across the page width.

9. Save the Component

- a. Review your entries for accuracy.
- b. Click **Save** at the bottom.
- c. The selected view or block will now appear on your page, styled according to your chosen layout.

- The “Create new EGR Text Link Card Container” form will open.

2. Enter Admin Title

- In the **Admin Title** field, add an internal name to identify this component in the Drupal backend.
- This title is **not displayed on the live page**—it helps content editors locate or organize components.
- Example: *Department Quick Links, Program Resources, or Footer Navigation*.

3. Add Section Title (Optional)

- a. In the **Title** field, add a heading for the group of text link cards.
 - b. This will appear above the cards on the page.
 - c. Example: *Explore Our Programs* or *Useful Links*.
- 4. Select Layout Style**
- a. Use the **Layout Style** dropdown to define how the section aligns within the page:
 - i. **Boxed** – contained within the main content width (standard).
 - ii. **Full Width** – stretches across the full page.
- 5. Set Background Color (Optional)**
- a. Enter a hex code (e.g., #f8f9fa) or a named color (e.g., *lightgray*) to define the background color for the entire container.
 - b. Leave blank for a white background.

Adding Text Link Cards

- 6. Scroll to the “Text Link Cards” Section**
- a. This is where you’ll add individual link cards within the container.
- 7. Add a Text Link Card**
- a. Click **Add EGR Text Link Card**.
 - b. Each card will open with editable fields.
- 8. Card Admin Title (Optional)**
- a. Enter a backend-only name for the card.
 - b. This is for internal reference and won’t be shown on the live site.
- 9. Card Title (Required)**
- a. In the **Title** field, enter the text that will appear as the clickable link title on the card.
 - b. Example: *Undergraduate Admissions, Faculty Directory, Apply Now*.
 - c. If a URL is provided, this title becomes the hyperlink text.
- 10. Add URL**
- a. In the **URL** field, add the destination link for the card.
 - b. Accepted formats:
 - i. Internal path: /node/add, /academics/programs
 - ii. External link: <https://example.com>
 - iii. Special placeholders:
 - 1. <front> → Homepage
 - 2. <nolink> → Plain text without a clickable link

3. <button> → Keyboard-accessible link text only

11. Add More Cards (Optional)

- a. Click **Add EGR Text Link Card** again to add up to **four cards per row**.
- b. Each card can have its own title and link.

12. Reorder or Collapse Cards (Optional)

- a. You can drag cards to reorder or click **Collapse** to simplify the view while editing.

13. Save the Component

- a. After adding all cards and reviewing your entries, click **Save**.
- b. The link cards will display in a grid layout under the chosen section title, using your selected background color and layout style.

Create new EGR Text Link Card Container

Admin title

The admin title is used to help identify paragraphs when using them as blocks.
Content limited to 255 characters, remaining: 255

EGR Timeline

1. Add the Component

- In the page editor, click **Add Component → EGR Timeline**.
- The “Create new EGR Timeline” form will open.

2. Enter Admin Title

- a. In the **Admin Title** field, enter an internal name to identify this component in the Drupal backend.
- b. This is **not shown on the live page**.
- c. Example: *College History Timeline* or *Department Milestones*.

3. Add Timeline Title (Optional)

- a. In the **Timeline Title** field, enter the title for the entire timeline section.
- b. This will appear as the heading above your events.
- c. Example: *Our Journey, Engineering Milestones, or Program Growth Over the Years*.

4. Add a Subtitle (Optional)

- a. In the **Timeline Subtitle** field, provide a short descriptive paragraph about what the timeline represents.
- b. You can format the text (bold, italic, links, etc.) using the editor toolbar.
- c. Example: *Explore the key achievements and developments that shaped our institution.*

5. Choose Text Format

- a. Use the **Text Format** dropdown to select how the subtitle text is processed:
 - i. **Full HTML** – allows formatted content, images, and links.
 - ii. **Plain Text** – removes all formatting.

6. Scroll to the “Timeline Items” Section

- a. Each **Timeline Item** represents one event or milestone.

7. Add a Timeline Item

- a. Click **Add Timeline Item** to create your first event.

8. Admin Title (Optional)

- a. Add an internal name for this specific timeline entry.
- b. This is for backend reference only.
- c. Example: *College Founded (1950)*.

9. Enter the Year (Required)

- a. In the **Year** field, enter the year of the event (e.g., 2024, 1980, 1956).
- b. This value appears beside the event on the timeline.

10. Add Event Description (Required)

- a. In the **Event Description** field, write a brief summary of what occurred that year.
- b. You can format text using headings, links, bold, or images for visual emphasis.

- c. Example:

The College of Engineering established its first research center, expanding into sustainable energy studies.

11. Choose Text Format

- a. Use the **Text Format** dropdown to control HTML formatting for the description (Full HTML recommended).

12. Add More Events

- a. Click **Add Timeline Item** again to include additional years or milestones.
- b. Repeat steps 8–11 for each event in chronological order.

13. Select Layout Style

- a. Use the **Layout Style** dropdown to determine the section's alignment:
 - i. **Boxed** – keeps the timeline within a standard container width (recommended).
 - ii. **Full Width** – stretches across the page.

14. Set Background Color (Optional)

- a. Enter a color code (e.g., #f8f9fa, #ffffff, #18453B) or use a color name (*lightgray*).
- b. This defines the background color behind the timeline.

15. Reorder or Collapse Items (Optional)

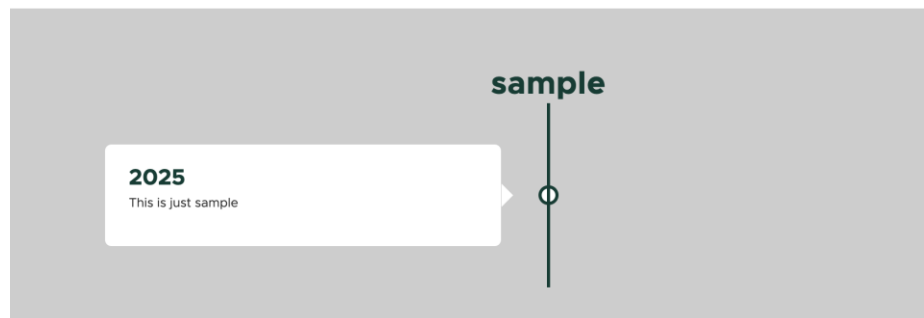

- a. You can drag timeline items to reorder them or click **Collapse** to simplify the editor view.

16. Save the Component

- a. After reviewing all entries, click **Save**.
- b. The timeline will display all events in sequence, showing years and corresponding descriptions.

sample vent

[Home](#) /

- a. This is where you add individual profile cards (e.g., faculty members, staff, or team profiles).

3. Add a Profile Item

- a. Click **Add Profile Item**.
- b. Each card represents one individual.

4. Fill Out Profile Details

- a. Each **Profile Item** form includes fields such as:
 - i. **Name** – The person's full name (displayed as the title of the card).
 - ii. **Title/Position** – Their role or job title (e.g., *Professor of Mechanical Engineering*).
 - iii. **Image** – Upload a headshot image.
 - 1. Recommended format: square image, PNG or JPG.
 - 2. Ideal size: 400x400 pixels.
 - iv. **Bio or Description** – Short description or bio of the person.
 - v. **Contact Info** (optional) – You can add email, phone, or address.
 - vi. **Link** (optional) – Add a link to the person's detailed profile page if available.
- b. You can add multiple profiles by clicking **Add Profile Item** again.

5. Set Number of Columns

- a. In the **Number of Columns** dropdown, choose how many profile cards should appear per row.
- b. Options:
 - i. **Auto (default)** – Automatically adjusts based on total profiles.
 - ii. **2 Columns** – Displays two cards per row.
 - iii. **3 Columns** – Displays three cards per row.
 - iv. **4 Columns** – Displays four cards per row.

6. Choose Image Style

- a. Use the **Image Style** dropdown to determine how profile images appear:
 - i. **Circle** – Displays rounded, circular headshots (recommended for modern layouts).
 - ii. **Square** – Displays standard square images.

7. Choose Card Style

- a. In the **Card Style** dropdown, select the layout for the cards:
 - i. **Vertical** – Displays profile image on top with text below (ideal for grid layouts).

- ii. **Horizontal** – Displays image beside the text (best for staff directories or lists).

8. Select Layout Style

- a. Choose how the entire component fits within the page:
 - i. **Boxed** – Constrained within the page's standard content width.
 - ii. **Full Width** – Stretches across the page for a more immersive design.

9. Show Icons (Optional)

- a. Toggle **Show Icons** to display icons next to contact information (e.g., email, phone, location).
- b. Recommended: **Enabled** for clarity and visual enhancement.

10. Set Background Color (Optional)

- a. Enter a hex code (e.g., #ffffff, #f8f9fa, #18453B) or a named color (e.g., *lightgray*).
- b. This sets the background color for the profile card area.
- c. Leave blank for the default white or transparent background.

11. Set Text Color (Optional)

- a. Enter a hex code (e.g., #000000 for black or #ffffff for white) to define the color of text on the cards.
- b. Adjust based on your chosen background color for readability.

12. Reorder or Collapse Cards (Optional)

- a. Drag cards to rearrange order or click **Collapse** to simplify your view while editing.

13. Save the Component

- a. Once all details are filled out, click **Save**.
- b. Your profile cards will display in the chosen layout and column configuration.

EGR Layout

1. Add the Component

- In the page editor, click **Add Component** → **EGR Layout**.
- The “Create new EGR Layout” form will open.

2. Configure the Title Section

- a. **Title** – Optional section heading that appears above the layout.
- b. **Heading Level** – Choose the size of the title (e.g., H2 or H3).
- c. **Title Color** – Enter a hex color code such as #18453B.
- d. **Show Separator Line** – Toggle this on if you want a horizontal line under the title.
 - **Separator Color** – Example: #00c24e
 - **Separator Width** – Example: 3px

3. Select Layout Style

- a. In the **Layout Style** dropdown, choose how the layout should appear:
 - **Boxed (Inside Container)** – Keeps content within page margins.
 - **Full Width** – Extends the layout across the entire screen width.

4. Add Layout Columns

- a. Scroll to the **Layout Columns** section.
- b. Click **Add EGR Layout Column** to insert your first column.
- c. Each column can contain one or more paragraph components such as:
 - EGR Content Block
 - EGR Text Link Card
 - EGR Profile Card
 - EGR Video
 - EGR Banner
- d. To add another column, click **Add EGR Layout Column** again.

5. Set Column Widths

- a. In each **Column CSS Classes** field, define the width using Bootstrap grid classes.
- b. Common examples include:
 - col-12 → Full-width single column
 - col-6 → Two equal columns
 - col-md-4 → Three equal columns

- col-md-3 → Four equal columns
- c. You can mix classes (e.g., col-12 col-md-6) for responsive layouts.

6. Customize Column Content

- Within each column, click **Add EGR Layout** under **Column Content**.
- Select the paragraph type to insert (e.g., text, video, banner).
- You can reorder, duplicate, or remove items inside the column as needed.

7. Adjust Row Styling

- Row CSS Classes** – Optionally add alignment or spacing classes, such as:
 - align-items-center – vertically centers column content
 - justify-content-between – evenly distributes columns
 - text-center – centers all text
 - b. **Gutter Size** – Controls spacing between columns (*None, Small, Medium, Large*).
 - c. **Vertical Padding** – Adjusts spacing above and below the layout (*Small, Medium, Large*).
 - d. **Background Color** – Add a hex value (e.g., #f8f9fa or #18453B) or Bootstrap class (bg-primary).

8. Save the Layout

- After configuring all columns and settings, click **Save**.
- Your layout section will appear as a responsive grid that automatically adapts to screen size.
- You can reopen and edit the layout anytime to add, remove, or reorder content.
